

How to place your cart at the curb

It's our goal to accurately serve your home each week. Large carts can be quite heavy and are built to be lifted with a mechanical arm or "helper arms" attached to the garbage truck. Proper cart placement on pick up day becomes essential when mechanical helpers are used.

*Good Cart Placement:
Wheels facing the home, carts are not close together, and carts are placed away from the mailbox.*

Cart Placement Guidelines

- Place your cart at the curb the night before your service day or by 6 am on your service day.
- Place cart within two feet of the curb.
- Avoid placing the cart near low hanging tree branches.
- Place the cart at least two feet away from permanent structures like mailboxes, walls, lamp posts, utility boxes, vehicles, etc. to allow the truck's mechanical arm to reach each container.
- Place your cart two feet from other carts; place carts side by side.
- Place your cart on a level surface prior to pick up; a good place is in the driveway.
- Make sure nothing is in between your cart and the street.
- When at the curb, cart wheels should be closest to the house.
